### **DETAILED ACTION**

Applicant's arguments filed on Sept. 14, 2004 have been fully considered.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Liebmann et al. (Liebmann) (5,807,649).

Liebmann discloses a method of transferring a lithographic pattern from a mask onto a substrate comprising the steps of forming plurality of resolvable features to be printed (Fig. 1), forming at least one non-resolvable optical proximity correction feature (Fig. 2) having a transmission coefficient in the range of greater than 0% to less than 100% (col. 8, lines 4-64), and adjusting the width, position and transmission coefficient of the non-resolvable optical proximity correction feature so as to maximize the process window for printing the plurality of resolvable features (Fig. 7, col. 7, line 42 – col. 8, line 3).

#### ***Allowable Subject Matter***

Claims 1, 4, 7, 8, 11, 14, 15, 18, 21, 22, and 27-30 are allowed.

Claims 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to claims 23 and 24 have been considered but are moot in view of the new ground(s) of rejection.
